Computer Science student who leads product and development, from defining requirements and running sprints to building full-stack web and mobile apps with React, TypeScript, Flutter, and Python. Experienced in team leadership, Agile coordination, and cross-functional collaboration. Looking for product management and software engineering roles where I can lead teams and own both the planning and the building.

EDUCATION

Bachelor of Science, Computer Science

Expected Graduation: Dec 2026

California State University, Fullerton

Relevant Coursework: Data Structures | Algorithms | Object-Oriented Programming | Operating Systems | Applied AI | Web Back End | Software Engineering | Compilers | File Structures & Databases | Front-End Engineering | Cybersecurity | Linear Algebra

SKILLS

Programming & Development

C++, Python, Dart, TypeScript, React, React Native, Flutter, HTML, SQL

Tools & Platforms

Supabase (Auth, Storage), PostgreSQL, Firebase (Auth & Firestore), Riverpod, go_router, PySide6, Anthropic API, Git, GitHub, Linux, VS Code, Figma (Wireframing & Prototyping), Cursor, Claude Code

Concepts & Methodologies

Data Structures, Algorithms, Object-Oriented Programming, Software Development Lifecycle (SDLC), Agile/Scrum, UI/UX Design Principles, Product Requirements, MVP Scoping, Roadmapping

Leadership & Communication

Cross-functional Collaboration, Technical & Written Communication, Team Leadership, Stakeholder Coordination

EXPERIENCE

Coffee Tenet | June 2026 - Present

Product Manager and Developer

- Lead product and development for Coffee Tenet's mobile app, a social café discovery platform that brings the company's 4C framework (Coffee, Culinary, Context, Community) to its community.
- Defined the MVP in a product brief covering prioritized features, user roles, business rules, and performance goals. Scoped the first release around 4C scoring, experience sharing, and personalized recommendations.
- Built the cross-platform app solo in Flutter with Supabase (PostgreSQL, Auth, Storage), Riverpod, and go_router. The app has 15 screens, including onboarding, map-based café discovery, 4C visit logging with photo uploads, and user profiles.

Women in Business and STEM CSUF | Fullerton, CA | December 2024 - June 2026

Team Coordinator June 2025 - June 2026

- Organized team schedules, meetings, and event operations to support 400+ members.
- Led communications, newsletters, and member engagement initiatives.
- Coordinated onboarding and supported smooth execution of club activities.
- Recognized as an Outstanding Board Member for leadership and contributions to the organization.

Leadership Team Intern December 2024 - June 2025

- Assisted with strategic planning, leadership initiatives, and club-wide decision-making processes.
- Recognized as the sole Outstanding Intern at the conclusion of the internship for exceptional leadership, initiative, and impact.

SELECT | July 2025 - August 2025

Project Management Intern

- Collaborated with the Project Manager and team to plan and deliver a client project on schedule and within scope.
- Contributed to sprint planning, task estimation, testing coordination, and milestone tracking within an Agile development environment.
- Applied leadership and technical skills to support cross-functional coordination and ensure milestone completion.

Panera Bread | Irvine, CA | April 2021 - December 2023

Team Lead + Trainer

- Led and trained team members across multiple roles, managing full shifts and onboarding new hires.
- Recognized as top earner for the Change for Children charity campaign.

SOFTWARE PROJECTS

Rey: AI Terminal Assistant | Python, PySide6, Anthropic API

github.com/bennarah/Rey-Terminal-Assistant

- Built a macOS desktop assistant that answers terminal and Git questions in plain English for beginner programmers, powered by Claude Haiku.
- Created a transparent, always-on-top PySide6 window with an animated pixel-art sprite that walks along the dock and opens a chat popup on click.
- Designed the sprite frames in Piskel and wrote the animation and window system from scratch in Python.

Nanuk: Sustainability Scanner | Flutter, Dart | FullyHacks 2026

github.com/nathanchamorro1/fullyhacks-2026

- Co-built a mobile app at FullyHacks 2026 that scans product barcodes and returns a sustainability score, grade, and plain-language impact summary.
- Built the scan result flow, connecting barcode scanning, product lookup, and scoring into one end-to-end experience.
- Added gamification to encourage repeat use: points, streaks, average grade tracking, and alternatives suggested for low-scoring products.
